

## 1. AOB

### 15.1 – New logo

A new logo will be proposed shortly to the representatives. It will include the RORC and UNCL marks to the IRC present IRC logo.

### 15.2 – Qualification of measurers. Request of the Turkish representatives

On the initiative of the Turkish representatives Congress debated the qualification of measurers generally without drawing any firm conclusions. It was agreed that the IRC Technical Committee would review the subject and make proposals during the course of the next 12 months. Noting that while it is clear that measurement responsibility lies within a country, this review will address appropriate standards, syllabus, and the possibility of 'measurer trainers'. ISAF will also be approached to discuss recognition of International Measurers for IRC.
