

Rating Rule equivalent measurements

This shows the equivalent abbreviations on ORC and IOR certificates if these are being used for IRC data. NOTE however that taking data from an IOR certificate is unlikely to now be up to date except for LOA and BMAX on an unmodified boat.

SAIL data should not be taken from an old IOR certificate but should be remeasured.

ORC SPL is measured in a different way from IRC STL (pole athwartships rather than on the centreline), so will be shorter. It is recommended that the actual STL is measured to ERS / IRC rules.
