

The Swedish rating office reports:

8 Swedish IRC certificates have been produced during the year out of two are new, the rest revalidations.

5 more certificates for Swedish boats are produced directly at the RORC Rating Office in the UK for boats sailing only in GBR, SWEE, RAN, RAN 8, VITRES and Emily of Cowes I believe..

- I don't understand why SWE 918 GARM is produced in Spain? Probably the owner resides there?

5 Swedish boats participated in the Fastnet Race, travelling from Sweden were C-Me and Solong.

The Swedish rating systems had appx 1200 certificates produced and ORC appx 50.

The Round Gotland Race had 23 finishers out of 195 starters this year due to severe weather, but no serious breakages, sinkings or MOBs.

We expect a significant growth (percent-wise) in IRC certificates in 2024 thanks to the Roshier Baltic Sea Race.
