

From Chinese Taipei (Taiwan), TPE

By Ting KUO & Bou WANG

TPE – Since 2016 we have been adopting the IRC system, and this year marks the 10th anniversary. Starting this year, yachts in Taiwan have begun to use more specialized sails such as Genoa Staysails, Spinnakers Staysail, and Flying Jib. At the same time, more performance yachts are entering Taiwan, which has encouraged us to be more meticulous in our measurements and to further enhance our technical expertise. We have also introduced 3D laser scanning technology and load cell weighing systems (+0.1% full scale) for sailboats applying for Endorsed Certificates, and we are proud to have successfully completed the first Endorsed measurement in Taiwan, and we will also promotion for everyone to apply for the endorsement certificate.
